Contents

Introduction	5
Business Functions Overview	7
Overview	7
Understanding Data Structure Design Aid	9
Overview	9
Create Data Structure	10
Create Data Structures	10
Access the DSD	10
Select Columns	11
Add Data Items to a Data Structure	12
Identify Required Columns	12
Specify Input/Output Columns	12
Create Business Function Source	15
Overview	15
Create Business Function	15
Create a Business Function Source Module	15
Access the BFDA	16
Associate Parent DLL	18
Name the Business Function	19
Attaching a Data Structure to a Business Function	20
Attach Tables and Business Functions to a Business Function	21
Attach Tables to a Business Function	21
Attach Other Business Functions to a Business Function	21
C Skeleton Source Files	21
Create the C Skeleton Source Files	21
Understanding .h and .c Source Files	22
Code and Build Business Functions	29
Overview	29
Understanding APIs	29
Common APIs	29
Miscellaneous APIs	31
JDB APIs	32
Visual Studio Tips	37
Build Business Functions	38
Build a Business Function	38

Named Event Rule Business Functions	38
Create NER Business Function	39
Runtime Data Structures	39
Event Rules Design	40
Event Rules Table I/O	55
Unicode	60
Standalone Business Function Build	61
Attach a Business Function	65
Overview	65
Call a Business Function from an Application	65
Debug Business Functions	69
Overview	69
Debug Business Functions	69
Setting up Visual Studio for Debugging C functions	69
Run Application that calls the Business Function	75
Other Visual Studio Debug Features	75
Closing out of Debug session	76
Debug Log Files	76
Overview	76
Turn on JDE Debug Log	76
Capture JDEdebug.log	78
Finding the JDEdebug.log	78
Review JDEdebug.log	81
Turn off JDE Debug Log	82
Power Forms and Subforms	83
Overview	83
Power Forms	83
Power Browse Forms	83
Power Edit Forms	83
Subforms	84
Embedded Subforms	85
Reusable Subforms	86
Communication between Parent Form and Subforms	90
Subform Initialization	96
Other Subform System Functions	97
Other Power Form/Subform Features	98
Understanding Cache	99
Overview	99
JDECACHE APIs	99
Implementing Cache	100
Cache Servers	100
Understanding Cache Server Code	101
Typical Loop through a Cache Using a Cache Server	104

Sample Index Structure _____	105
Master Business Functions _____	107
Business Functions of an MBF _____	108
Understanding Transaction Processing _____	111
Overview _____	111
Transaction Boundaries _____	111
Implementing Transaction Processing _____	111
Enable Transaction Processing on a Form _____	112
Include a Called Form in the Transaction Boundary _____	113
Include a Called Business Function in the Transaction Boundary _____	114
Introduction to E1 Pages _____	117
Overview _____	117
Element Styles _____	118
Layouts _____	119
DAT File Structure _____	123
Global Options _____	123
Element Definition _____	124
Action Performed _____	126
ASCII Art _____	127
Properties File _____	128
Creating an E1 Page _____	129
Running E1 Page Generator _____	129
Installing an E1 Page _____	130
Approving and Publishing an E1 Page _____	132
Advanced Exercises Overview _____	135
Exercise Naming Standards _____	135
Data Structures Design Aid _____	137
Business Requirement _____	137
Objective _____	137
Exercise _____	137
Create the F58x01 Check for Existing Item Data Structure _____	137
Create the F58x02 Check for Existing Item Branch Data Structure _____	138
Create and Code C Business Function _____	139
Business Requirement _____	139
Objective _____	139
Exercise _____	139
Create the F58x01 Check for Existing Item Master Business Function _____	139
Create Skeleton for B58x0010 _____	139
Add Logic to B58x0010 _____	140
Modify Item Branch Application to use B58x0010 _____	140

Create and Code NER Business Function	141
Business Requirement	141
Objective	141
Exercise	141
F58x02 Check for Existing Item Branch Business Function	141
Add Logic to N58x0020	141
Modify P58x02 to Call N58x0020	141
Debugging C Code	143
Business Requirement	143
Objective	143
Exercise	143
Setup IDE	143
Power Form & Subforms	145
Business Requirement	145
Objective	145
Exercise	145
Create Item Branch Application	145
Cache	149
Business Requirement	149
Objective	149
Exercise	149
Create Cache Server	149
Implement Cache in the Item Branch Application	150
E1 Pages	151
Business Requirement	151
Objective	151
Exercise	151
Create E1 Page (Instructor Led)	151
Create second E1 Page	151
Case Study	153
Business Requirement	153
Objective	153
Exercise	153
Create an Item Balance Cache function	153
Create a Master Business Function	154
Integrate MBF into Power Form Application	155
