

Accelerated Developer Advanced 9.1

Contents

Introduction	7
Business Functions Overview	9
Overview	9
Understanding Data Structure Design Aid	11
Overview	11
Create Data Structure	12
Create Data Structures	12
Access the DSD	12
Select Columns	13
Add Data Items to a Data Structure	14
Identify Required Columns	14
Specify Input/Output Columns	14
Create Business Function Source	17
Overview	17
Create Business Function	17
Create a Business Function Source Module	17
Access the BFDA	18
Associate Parent DLL	19
Name the Business Function	21
Attaching a Data Structure to a Business Function	22
Attach Tables and Business Functions to a Business Function	23
Attach Tables to a Business Function	23
Attach Other Business Functions to a Business Function	23
C Skeleton Source Files	23
Create the C Skeleton Source Files	23
Understanding .h and .c Source Files	24
Code and Build Business Functions	31
Overview	31
Understanding APIs	31
Common APIs	31
Miscellaneous APIs	33
JDB APIs	33
Visual Studio Tips	38
Build Business Functions	39

Build a Business Function	39
Named Event Rule Business Functions	39
Create NER Business Function	40
Runtime Data Structures	40
Event Rules Design	40
Event Rules Table I/O	55
Unicode	60
Standalone Business Function Build	61
Attach a Business Function	65
Overview	65
Call a Business Function from an Application	65
Debug Business Functions	69
Overview	69
Debug Business Functions	69
Setting up Visual Studio for Debugging C functions	69
Run Application that calls the Business Function	75
Other Visual Studio Debug Features	75
Closing out of Debug session	76
Debug Log Files	77
Overview	77
Turn on JDE Debug Log	77
Capture JDEdebug.log	79
Finding the JDEdebug.log	79
Review JDEdebug.log	82
Turn off JDE Debug Log	83
Power Forms and Subforms	85
Overview	85
Power Forms	85
Power Browse Forms	85
Power Edit Forms	85
Subforms	86
Embedded Subforms	86
Reusable Subforms	88
Communication between Parent Form and Subforms	92
Subform Initialization	98
Other Subform System Functions	99
Other Power Form/Subform Features	100
Understanding Cache	101
Overview	101

JDECACHE APIs	101
Implementing Cache	102
Cache Servers	102
Understanding Cache Server Code	103
Typical Loop through a Cache Using a Cache Server	106
Sample Index Structure	107
Master Business Functions	109
Business Functions of an MBF	110
Understanding Transaction Processing	113
Overview	113
Transaction Boundaries	113
Implementing Transaction Processing	113
Enable Transaction Processing on a Form	114
Include a Called Form in the Transaction Boundary	115
Include a Called Business Function in the Transaction Boundary	116
Introduction to E1 Pages	119
Overview	119
Element Styles	120
Layouts	121
DAT File Structure	124
Global Options	124
Element Definition	126
Action Performed	128
ASCII Art	128
Properties File	130
Creating an E1 Page	131
Running E1 Page Generator	131
Installing an E1 Page	132
Approving and Publishing an E1 Page	133
Advanced Exercises Overview	137
Exercise Naming Standards	137
Data Structures Design Aid	139
Business Requirement	139
Objective	139
Exercise	139
Create the F58x01 Check for Existing Item Data Structure	139
Create the F58x02 Check for Existing Item Branch Data Structure	140
Create and Code C Business Function	141
Business Requirement	141

Objective..... 141

Exercise 141

 Create the F58x01 Check for Existing Item Master Business Function 141

 Create Skeleton for B58x0010..... 141

 Add Logic to B58x0010..... 142

 Modify Item Branch Application to use B58x0010 142

Create and Code NER Business Function..... 143

 Business Requirement 143

 Objective..... 143

 Exercise 143

 F58x02 Check for Existing Item Branch Business Function 143

 Add Logic to N58x0020..... 143

 Modify P58x02 to Call N58x0020 143

Debugging C Code..... 145

 Business Requirement 145

 Objective..... 145

 Exercise 145

 Setup IDE..... 145

Power Form & Subforms 147

 Business Requirement 147

 Objective..... 147

 Exercise 147

 Create Item Branch Application 147

Cache 151

 Business Requirement 151

 Objective..... 151

 Exercise..... 151

 Create Cache Server 151

 Implement Cache in the Item Branch Application..... 152

E1 Pages..... 153

 Business Requirement 153

 Objective..... 153

 Exercise 153

 Create E1 Page (Instructor Led)..... 153

 Create second E1 Page..... 153

Case Study..... 155

 Business Requirement 155

 Objective..... 155

 Exercise..... 155

Create an Item Balance Cache function 155
Create a Master Business Function..... 156
Integrate MBF into Power Form Application 156
