

Additions to JDEtips Journal, August 2012

If you are reading this (and I hope you are!) chances are very high that you've heard that the User Interface in EnterpriseOne 9.1 has changed significantly.

I'm pleased to announce that our new 9.1 Common Foundation / User Interface manual will be available next week. Authored by Russ Bartunek, I feel this manual captures every significant change to the User Interface with step-by-step instructions, illustrated with dozens of screen shots.

The price is a modest \$249 (a \$100 savings off the regular price of \$349). Reply to this email if you'd like a copy to be reserved for you.

Speaking of Russ Bartunek and 9.1 . . . Russ' experience installing the 9.1 Standalone Demo is our first article, detailed below. If you don't enjoy spending your days (and nights) trying to install the Demo, [read this article!](#)

■ Technical

Installing the EnterpriseOne 9.1 Standalone Demo, by Russ Bartunek

See what happens when a Distribution expert takes on the task of installing this new version of JDE--the good, the bad, and the you-don't-want-to-go-there. From start to finish, this article documents the process from an application guy's point-of-view.

■ Distribution / Sales Order Management

Basket Repricing's Almost Undocumented Feature, by Tim Scott

If you have a product that needs to be repriced based on different units of measure, and you thought that wasn't possible in JDE, think again. This tip brings to light a barely documented feature that allows you to reprice correctly for multiple packages and item numbers of the same product.

■ HR / Payroll

Reducing Payroll Errors, by Buffy Dorpinghaus

There's no magic bullet for reducing payroll errors in JDE. But there are ways it can be done, using a combination of standard and custom reports, along with a little investigative work. Learn how you can reduce the pain in your payroll process here.

■ **Data Collection**

Data Collection Solution Using EnterpriseOne Applications, by Heather Phillips

It's a little known fact, but it is possible to create your own data collection solution for handheld devices using the EnterpriseOne applications you already have. This tip will help you decide if this method is right for your company.

■ **CIO Corner**

Removing the Barriers to Project Ownership, by Steve Phillips

You can hire the best consulting firm in the world, but if you want your project to succeed, you have to "own it." Find out what that means, and what it takes to make sure your company is in control of your ERP implementation.

■ **Project Management**

What's Hot with JDE EnterpriseOne 9.1 (Webucation Recording), by Greg Davis

The JDE world is all abuzz about E1 9.1. From the new features, to best practices, to planning your upgrade and more, this webucation session offers an outstanding primer to what this new release has to offer.

What's ahead on the JDEtips horizon:

Don't miss Andy's [blog](#)! He recently sat down with our Reporting guru Penny Allen to learn what you need to know about BI Publisher.

Our summer/fall session of [JDEtips University](#) is already in session. Register now for our remaining classes, as many of our Spring sessions filled up quickly. We're offering classes onsite at our Longmont, Colorado, training facility or virtually through our half day schedule.

Do you have an interesting solution or advanced knowledge you'd like to share? We pay \$1000 for each published JDEtips Journal article. If you're interested in writing for us and would like to see our list of topics needed—or if you already have a great topic idea—please drop me a line; I'd love to hear from you.

Until next time. . .
