Adventures in JDE Certification Land

Ever wonder where time goes? While JDEtips Journal reached its ten year milestone this summer, I realized that this November marks five years from when I first joined the JDEtips/Klee Associates publishing team. There's a lot I've learned in those five years about being an editor for a software journal; I've narrowed it down to my personal five lessons I won't soon forget. [\(read more...\)](#)

Table of Contents for the September/October 2010 Issue of JDEtips Journal

E1Distribution / Procurement: Drop Ship Costs by the Mile (or Kilometer), by

Tim Scott

Calculate multiple drop ship costs easier in EnterpriseOne with Advanced Procurement Pricing. This article details how it's done and when to use this functionality.

E1WDistribution / Warehouse Management: Improving the Picking Process with Warehouse Management, by Tyler Simonton

The title says it all: Warehouse Management can be used to improve the efficiency of your distribution center's pick process in a number of ways. Written by a world-class expert in JDE Logistics.

E1WFinancials / General Ledger: JDEtips Training Manual Sample: Indexed Allocations, by Steve Kuemper

Get a quick primer on Indexed Allocations with a chapter from our General Ledger Training Manual. **Note:** You can [purchase](#) the entire General Ledger Training manual, as well as all the rest of our JDEtips manuals.

E1Reporting: How to Graph It in the Web Client, by Ricky Cai

Would you like to create a dashboard effect with pie charts, bar graphs, and line graphs? Want to graphically display critical JDE data without using Hyperion or Crystal Reports? Sure you do! It's possible with Text Block and Text Block Control available with Tools 8.96.

E1Technical / Customizing EnterpriseOne: In What Task View Does That Program Exist?, by Jeff Saenz

Tired of digging through task views to find a seldom used report or trying to determine what tasks are no longer used? This article offers an application (code included) that will help you speed up those searches.

E1

knowledge with your team while assessing your business needs and providing you with the solutions you need.

E1 Technical / Security: JDE Self Service Password Reset, by John Gersic

"I'm locked out of the system. Can you reset my password?" If you're getting one or more of these calls a day, you'll appreciate this solution that allows users to securely reset their own passwords. This article includes the how-to, with source code.

...Continued from Colleen's message...

5) *JDEtips* articles are not at all dry. Our authors have a knack for adding in quite a bit of humor to their articles. I laughed for a week when Russ Bartunek opted to ditch the ubiquitous touring bikes in favor of "road kill". We've had some interesting names for scenario companies as well, including some that were just too risqué, even for us.

4) *JDEtips* authors are an international group. Our contributors are located in all corners of the earth, from here in the USA, to our north in Canada, way to our south in New Zealand. We have authors throughout Europe and Asia as well. In fact, the only continent that I don't think we have any authors is Antarctica.

3) Our readership is also worldwide, as I've had pointed out a few times when I've made seasonal or weather references in our issue announcements. It's fun to hear how nice summer is in the Southern Hemisphere when we're in the grip of a wintry blast here in Buffalo, NY.

2) It takes a larger team to produce each issue of *JDEtips Journal*. Besides Laura Donovan, our Director of Publications, and me, we have several technical advisors who provide insights on the viability of each tip, as well as third editor who finds those missed edits that after the fifth reading start to look fine. Andy Klee also reviews each article in detail as well.

1) **Last but not least**, I've learned that when you work with a solid team, authors, advisors, other editors, all who are committed to excellence, it is possible to produce a journal that provides our readers with the best advanced JDE knowledge and previously undocumented tips. It's a privilege we look forward to delivering to you for many years to come.

Before we part for this issue, one quick reminder: You can sign up now for *JDEtips University Spring 2011* classes. You can find our schedule in the left column, and read more about *JDEtips* training [here](#).

Until next time...
