**A Message from Colleen Low
Larkin, Managing Editor.**

For our November/December 2009 issue is ready for you to download. As always, we have a great line up of time saving ideas to help you get more value out of your JDE investment. [\(read more...\)](#)

Check out Andy's Blog

What's Hot & What's Not with JD Edwards

Table of Contents for the November/December 2009 Issue of JDEtips Journal

E1W Distribution / Sales Order Management: JD Edwards vs. SAP:

Sales Order Processing, Ted Aseltine and Thomas Woelfel

Two different ERP systems + two experts = one great dialogue comparing JDE and SAP sales order processing. The differences and similarities may surprise and enlighten you.

E1W Distribution / Procurement: Automating Vehicle and Equipment Purchasing Using Standard Kit Processing, by Sarah Mills

This is a very thorough case study on how one entity thought out of the box and used standard Kit Processing in a creative way to automate a laborious manual purchasing process. Best of all, little setup was needed. Does it get any sweeter?

E1W Manufacturing: Managing Low and Irregular Demand Using the Configurator, by Jonathan Rose

Don't let low and lumpy demand get you down. There's a way to manage it using the Configurator that allows you to plan at the product family level.

E1 Reporting, Query, and Business Intelligence: Integrated BI Publisher for EnterpriseOne, by Scott Beebe

We've had numerous requests for a BI Publisher article, and this one delivers the goods. Learn how to get set up and on your way to producing well-formatted reports.

E1 Technical / CNC: Xe® to 8.12/9.0 System Administration Net Change, by Gregg Larkin

Planning an upgrade from XE to 8.12 or 9.0? This article covers what stays the same and what changes between versions when it comes to menu management, application security, and more.

E1W CIO Corner: Issues in Technology Leadership, Part 4: Organizational Structure, by CJ Rhoads

Is your company's technology organization structured for success or failure? Would integrating IT into the main business structure work for your business? Find out what you can do to better structure your IT team within your company. There's no one right answer, but this article will help you think it through.

...Continued from Colleen's message...

Leftover training budget? Don't let it slip away, click [here](#) to see our JDEtips Spring 2010 training schedule and sign up now, before those dollars disappear. Or, if you can't wait for spring, give Sandy Acker a call and set up on-site training for your team. You'll be surprised at how affordable this is.

It's hard to believe, but another year, and our first decade of publishing JDEtips is coming to a close. This year, has been, well, interesting as the economy continues to struggle or recover (depending on what source you listen to). One lesson nearly everyone learned was to do more with less, whether it meant postponing upgrades and new software purchases, or consolidating roles within the organization. At JDEtips, we've been providing just the type of knowledge that helps companies survive, even thrive, in any economic climate, since 2000. Whether it's an article that discusses a time-saving or cost-cutting workaround to a thorny JD Edwards problem, or training that provides your team with not just knowledge of the software, but how to apply it to meet your business needs, we've got you covered. And we'll continue to do so in 2010 and beyond.

From all of us here at JDEtips, we wish you a wonderful holiday season and a prosperous new year!

Until next time...

Colleen Low Larkin
JDEtips Managing Editor
