

## JDEtips' Greatest Tips

Volume I

By JDEtips, Inc.

**E1 Editor's Note:** A summary of our greatest tips and tricks?! How can you go wrong? We're sharing tips on everything from the UDC that controls fast path options, to Orchestrator and other UDO functionality, to the 'did-you-knows' and 'gotchas' for Developer tools, to some of our most popular CNC topics that can save you time and heartache. It's all here and more!

### Introduction

At JDEtips we have weekly meetings to determine (and agree upon) what we will post on our LinkedIn home page. Our goal is to provide helpful little 'JDE' nuggets for our followers. Not only do our field consultants provide us with their 'tips and tricks' which are invaluable to a JDE user, but it's also just plain hard to keep up with all the new functionality that Oracle provides for all of us. We like to investigate and test new functionality because it keeps us on our toes, and we like to share our results with the community. Then one day it dawned on us that this information should be available to our Knowledge Express readers, not just our LinkedIn followers! And this brings us to .... JDEtips' Greatest Tips, Volume 1.

We have included only our most successful posts, so we know what's hot and what's not. Our posts appeal to both new users and pros, and they also cover various modules in the JDE E1 system.

The following is a listing of our Greatest Tips, Volume 1, grouped together by module/category for ease of navigation.

Enjoy!

## Cross Functional

- Address Book Data Privacy
- Fast Path
- Message Center Print UBE
- Data Selection in E1 the 'ands' and 'ors'
- Import Assistant to import data from Excel
- Understanding System Codes
- QBE (Query by Example) Lines
- EnterpriseOne Release Numbering logic
- Supplemental Data
- Object Usage Tracking
- Task Search
- Function Keys
- Data Protection Configuration (P0040)
- Finding the Business View associated to a specific form
- UBE launching can bypass the Printer Selection Prompt when submitting the UBE

## User Defined Objects Including Orchestrator

- UX One Role-Based Analytics
- Enhanced Form Extensions
- UDOs – stop sharing without deleting the original object
- UDO Security
- Classic E1 Page vs Composed Page defined
- List View UDO
- Configuring Search Groups
- Custom Search Groups
- Promoting UDO objects to ensure all dependencies are included
- UDOs – there is a hard-coded limitation for the number of UDOs that a user can have
- UDOs – how to determine who last modified a UDO
- Orchestrator and workflows
- Orchestrator to invoke external REST API
- Orchestrator Studio and Logic Extensions
- Orchestrator Connections
