

Address Book

*Beth Outtrim***Address Book Suite Magic**

Tricks to Keeping Everything in Sync...and More!

Ah yes, the 'Keeper of Address Book' is an extremely important role! Garbage Address Book records snowball into bad data in both Accounts Payable (Supplier Master) and Accounts Receivable (Customer Master) and beyond. This article summarizes solutions from several different clients that are part of the Quest Financial SIG and is a goldmine.

Development

*Penny Allen***EnterpriseOne Development Tools**

An Introduction for Newbies

One distinguishing feature that has always set JDE E1 apart from the competition is its user-friendly capacity to modify or create new development objects. Designed as a development toolset for power users, it doesn't require experience in programming — now that is sweet! This article will introduce you to the basics and you'll be off and running!

Distribution

*Ute Cole***Protecting Sales Margins & Prices**

Tips (Not Tricks) For You to Consider

The multitude of choices available for sales order margin and price protection options can be truly overwhelming. Since there isn't a one-size-fits-all solution, you really need to understand the full gambit before you can make well-informed decisions for your business. Leveraging Ute's extensive experience provides valuable insights to help you assess the pros and cons effectively.

Technical/CNC

*Tim McMurdo***Keeping Your JDE System Clean**

A Maintenance Checklist for CNC Administrators

JD Edwards stands as an excellent ERP system enabling efficient management of business processes. Nevertheless, like all systems, JDE demands regular maintenance for sustained effectiveness. Tim provides a comprehensive guide on various routine maintenance tasks essential for ensuring optimal performance of your JDE system.

Technical/User Defined Objects

*Cindy Grim***Creating Row & Form Exits via Form Extensions**

More Exciting UDO Functionality

You're already familiar with row and form exits as they are used extensively throughout JD Edwards E1. They offer a quick and easy way to access related data while working within an application. Now, with further enhancements to User Defined Objects (UDOs), you can effortlessly create row and form exits using form extensions. It just keeps getting better!
