## Dynamic Viewing of E1 Attachments

5

Now Available with Tools 9.2.8.2

We're excited about the new 9.2.8.2 enhancement for viewing media object attachments - users will love it! Andrew will guide you through setting up attachments in a CafeOne layout so you can view them directly alongside the related data and work with them interactively. Sweet!

## Custom Processing Option Templates

14

Event Rule Logic to Support 'Set Data Selection' in a Batch Job

"Keep those end users out of the data selection screens when running a report!" Instead, consider using custom processing options to allow users to input values. You can then use System Functions within event rules to dynamically set the data selection.

Manufacturing/  
Forecasting &  
Planning

## Scheduling and Resource Management

33

Using CAM's Resource Management Functionality in Manufacturing

This article explores E1's Resource Management in the CAM module as a native tool for shop floor scheduling. Keith shows how to assign workers or crews to work order routing steps, track resource availability and material shortages, effectively bridging the gap between MRP planning and daily execution.

Technical/  
Orchestrator

*Cindy Grim*

## An Introduction to Orchestrator Studio

59

Making Sense of Orchestrator—One Step at a Time!

While Orchestrator Studio has been available for some time, many users are only now upgrading to the necessary Tools Releases required in order to fully leverage its capabilities. Don't be overwhelmed by its vastness, this article will help you to make sense of Orchestrator – one step at a time!
