JDEtips' Greatest Tips	6
<i>Volume 3</i>	

The hits keep coming with Volume 3 of JDEtips' Greatest Tips – a curated collection of the most popular tips from JDEtips' LinkedIn posts, now available for Knowledge Express readers. Spanning modules and roles across the JDE E1 ecosystem, this volume covers everything from Address Book to UDOs, and more. Whether you're a new user or a seasoned pro, you're sure to find a few gems worth bookmarking.

Development
Penny Allen

Your Developer's Toolbox	53
<i>A Guide for Users New to the E1 Developer Tools</i>	

New to the E1 Fat Client development tools? Author Penny Allen takes you on a guided tour of the Object Management Workbench – demystifying some of the most common object types, naming conventions, and design tools that make up the developer's toolbox. A great read for new hires and curious BAs alike.

Troubleshooting DBA Calculation Issues	77
<i>A Step-By-Step Guide</i>	

When a DBA fails to calculate – for one employee, a group, or everyone – knowing where to start makes all the difference. Author Buffy Dorpinghaus walks HR and Payroll professionals through a practical four-step troubleshooting framework in E1, covering employee data, enrollment, DBA instructions, and other factors that can quietly derail a payroll run. A must-have reference for anyone who has ever stared down a DBA mystery mid-cycle.

Orchestrator
Cindy Grim

Form Control Function in Logic Extensions	97
<i>Auto Populating Data and Disabling Controls on Forms Made Easy</i>	

Learn how to use Logic Extensions and Form Extensions in E1 to auto populate a field value and lock it from editing, no development background required. Using the Customer Master application as a practical example, Cindy walks through building two logic extensions in Orchestrator Studio and wiring them into a Form Extension – a no-code solution any business analyst or power user can adapt across E1.
