JD Edwards Knowledge. Transferred. Sustained.

Accelerated Developer Advanced

N. Lerner, Land O' Lakes —

"I felt this was superior to [another company]'s JDE training classes. The training environment is more interactive, and instructors are able to participate directly with student desktops, which gives a very "in-person" feel to an online class."

J. Bastida, RSI Home Products —

"This is the best instructor I ever have had; he has the knowledge and experience, but comparing with other trainings I have had, he has the capability to transmit his knowledge in a way that makes complex topics look easier than they seem."

O. Norstrom, City of Kamloops —

"Good quality for a good price. It beats [another company] on price and quality."

B. Brander, Henry Company —

"The instructor has in-depth knowledge and hands-on experiences, which is rare to me; many instructors are good at classroom setting but [don't] really have real world experience, which makes a huge difference. He knows how to connect the real world and training materials. [He also] went far beyond the scope of training, which I really appreciated."

J. Baring, Viva Energy Australia —

"I did the JDE Basic Developer course a month ago and this Advanced course is excellent as well."

B. Richards, Blackmores, Ltd. —

"The only other training I have undertaken has been through JDEtips, and with the same instructor, but both courses have been excellent... The whole course was honestly great."

P. Weiler, Consultant —

"The course was setup to build on each exercise and that made the course very easy to follow. The course was not just 'turn to page 3 and do this.' It was a 'real life scenario.' As a technical person, I wish I had learned these topics over 10 years ago. I learned so much. Great course."
