# Documenting Processing Options and Data Selection
(even in a Multi-Language Environment)

By Ralf Hanekamp

Ever tried to print the processing option values and data selection values for documentation purposes? And did it work?

It works for English language users with a row exit from Batch Versions or Interactive Versions or directly with program R98306. However, for users with a different language code, the Processing Option values are not displayed on the report.

Here's what is going on behind the scenes: Processing options values are not stored in a table but in a 'Blob' (Binary Large Object). A 'BLOB' is a database field that has no maximum size limit. In the Versions List table F983051 you can find the program ID, description and its versions.

VRPID	VRVERS	VRPODATA	VRJD	VRFRMTSTR
P4210	ZJDE0001	Blob: See detail	Sales Order Entry - SO Order Type	
P4210	ZJDE0002	Blob: See detail	Sales Order Entry - CO Order Type	
P4210	ZJDE0003	Blob: See detail	Sales Order Entry - SQ Order Type	
P4210	ZJDE0004	Blob: See detail	Sales Order Entry - SB Order Type	
P4210	ZJDE0005	Blob: See detail	Sales Order Entry - SD Order Type	
P4210	ZJDE0006	Blob: See detail	Sales Order Entry - WO Interface	
P4210	ZJDE0007	Blob: See detail	Sales Order Entry - ST Order Type	
P4210	ZJDE0008	Blob: See detail	Sales Order Entry - Configurator	
P4210	ZJDE0009	Blob: See detail	Sales Quote - Configurator	
P4210	ZJDE0010	Blob: See detail	Sales Order Entry - Non Transactional - Web	
P4210	ZJDE0011	Blob: See detail	Sale Order Entry - Store & Forward Configurator	
P4210	ZJDE0012	Blob: See detail	Sales Order Entry - Non Transactional - Windows	
P4210	ZJDE0013	Blob: See detail	Sales Order Entry - Store And Forward	
P4210	ZJDE0014	Blob: See detail	Return Material Authorization - CSMS	
P4210	ZJDE0015	Blob: See detail	RMA for Credit Order - CSMS	
P4210	ZJDE0016	Blob: See detail	Sales Order Entry - Ship and Debit	
P4210	ZJDE7001	Blob: See detail	Sales Order Entry - Detail - Brazil	
P4210	ZJDE7002	Blob: See detail	Sales Order Entry - Header - Brazil	
P4210	ZJDE7003	Blob: See detail	Sales Order Entry - Return Order - Ship To	
P4210	ZJDE7004	Blob: See detail	Sales Order Entry - Return Order - Ship From	
P4210	ZJDE7005	Blob: See detail	Sales Order Entry - Reverse Order	
P4210	ZJDE7006	Blob: See detail	Sales Order Entry - Return Order - Purchases	
P4210	ZJDE7007	Blob: See detail	Transfer Orders - Brazil	
P4210	ZJDEB0001	Blob: See detail	Sales Order - Agreement	
P4210	ZJDEC0001	Blob: See detail	Inter-Branch Sales Order Entry	
P4210	ZJDEC0002	Blob: See detail	Credit for Returned Containers	

In the Processing Option Text table F98306 you can find the processing option descriptions, but no processing option values.

With UBE R98306 these processing option values can be printed.

There are two ways to run this report. The first way is directly from Batch Versions (BV in the fastpath).

Select R98306 and make the correct data selection, e.g. 'Program ID'. Run the report and check the output. The second way is to search for the program or report you want to have the processing option values print and use the row exit to print only the selected version, or use the form exit to print the processing option values for all versions of the program or report.
