

PeopleSoft World A8.1.6 Announcement

Editor's Note:

JDEtips is pleased to share with you the following PowerPoint presentation that PeopleSoft's Product Manager, Tom Carrell, sent to us for publication. This presentation outlines the new direction PeopleSoft is taking with the World product – they are pumping new life into it with A8.1 Service Pack 6!

Possibly the most important piece of information in this announcement is that there is now a direct path from A8.1 to EnterpriseOne—that's big; it used to be a dead end, and you couldn't get from World A8.1 to EnterpriseOne.

Some clients may want to upgrade from A7.3 to A8.1 cum 6 to get the improved functionality, particularly in Lean Manufacturing. According to the announcements, there are over 250 functionality enhancements, plus some enhancements in the Technical Foundation.

You can view or download a PDF file with more details about the enhancements on the PeopleSoft Website as follows:
